

Tech tools become an enabler for **Fitzroy School**

Creating an efficient, modern-learning environment with **Chromebooks** and **Noel Leeming's Whiteglove+ service.**

“Choosing the Whiteglove service saved us 2 - 3 days of staff time setting up the devices - and the Chromebooks were ready to use within an hour of them arriving at the school.” Matt Hill, Head of ICT, Fitzroy School

About Fitzroy School

- Established 1885
- Located in Fitzroy, New Plymouth
- Roll of 437, children up to Year 6
- Strong focus on students to aspire for, and achieve, personal excellence with the support of the 'Fitzroy Family'.
- Close-knit school community - the 'Fitzroy Family' has supported the school and its students for generations.

Transforming teaching & learning with new technology

When Matt Hill, Head of ICT & Teacher at Fitzroy School, took on the task to review the current technology students were using in class, he was keen on looking at options that not only optimised their learning but also supported teachers in providing an efficient e-learning environment.

The current devices were cumbersome for students to use, requiring multiple logins to access their learning apps.

The power of Chromebooks

For Fitzroy School, the Chromebooks proved to be a fast, secure and reliable tech tool for students. They were easy-to-use, with only one login for students to access their personal account, documents and learning apps. Students feel confident knowing the devices are safe, providing a secure e-learning environment.

Not only are the students benefiting from the change of technology, but teachers are as well. With the Google Management Console, teachers have greater control over their students' devices. They can easily manage the learning tools and apps students have access too, change or update apps on a single or group of devices - all from one central device.

About Whiteglove+ Service

Noel Leeming's end to end setup process for Chromebooks so they are classroom ready as soon as you 'unbox' them. This service includes:

- Register all devices into the Google Management Console saving hours of staff time. Once all devices are registered, the teacher has greater control of users, devices and apps across a number of Chromebooks
- Enrolment of Chrome Education licenses to ensure devices can be managed seamlessly and comply with licensing standards
- Asset Tag devices - physically label the Chromebooks and match to the Asset ID in the Management Console to allow easy tracking and identification
- Connect all devices to the school Wi-Fi
- Training - provide staff training & ongoing helpdesk support after delivery

Benefiting from a quick and easy deployment

When the devices arrived at the school each one had been pre-enrolled into the 'Google Management Console'. On arrival, Matt called the Noel Leeming Technical Specialist to walk him through the training via Skype.

In just one hour of training, the devices were ready to go.

“The specialist made a process which could have taken 2-3 days quick and easy and we learned some great tricks and tips”
