

MINECRAFT
EDUCATION EDITION

Liberate the visionary in every student with Minecraft: Education Edition

Minecraft is one of the most popular games with 91 million + users worldwide and now Minecraft: Education Edition licenses are available at no cost to all state and state integrated schools.*

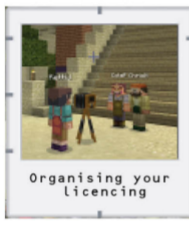

"I used Minecraft: Education Edition in my Year 5 & 6 class at Parnell District School and found it to be a powerful tool for engaging learners. Students could show their understanding of new learning in innovative ways and loved the ability to work collaboratively with their peers. As the teacher, I was able to access a variety of pre-made worlds and lessons to meet learning objectives across the curriculum. I really like that the Code Builder built directly into Minecraft: Education Edition allows students to explore aspects of computational thinking within the game itself"

- Morgan McKeen, Microsoft Education Manager NLG and Microsoft Innovative Educator Fellow

Get started today:

Whatever platform you are on, our Tech Solutions team can set your school up with Minecraft: Education Edition, as well as taking care of the techie stuff like:

All this for \$289 +GST
